SUMMARY

Full-Stack Web Developer with professional experience in Laravel and modern front-end frameworks such as React and Next.js. Skilled in building RESTful APIs, integrating payment systems, and designing scalable MySQL databases. Passionate about clean architecture, performance optimization, and delivering secure web applications.

WORK EXPERIENCE

Back-End Web Developer | *SMCT Group of Companies* | [July 2025 – Present]

- Working as a back-end developer using **Laravel**, specializing in RESTful API development and **MySQL** database design and management.

On-the-Job Training (OJT) – IT Support & Development Intern Trinidad Municipal 2024-2025

- Assisted in configuring network switches, basic VLAN setup, and device connectivity to support stable network infrastructure
- Helped with CCTV system setup, including camera configuration, cabling, and monitoring system installation.
- Supported the IT team with general troubleshooting tasks and basic system maintenance. Gained hands-on experience with both hardware setup and web development tasks during the internship.

Freelance Project Experience

Car Rental Booking System with PayPal Integration

- Developed a full-stack car rental web application using HTML, CSS, JavaScript, PHP, Laravel, and MySQL.
- Integrated PayPal payment gateway for secure, real-time transactions.
- Features included user registration, car listings, availability management, and booking confirmation via email.

Event Booking Platform with Real-Time Chat

- Created an event booking system where users could register for events, browse categories, and reserve seats.
- Implemented real-time chat functionality using Laravel with broadcasting (e.g., Pusher or Laravel Echo).
- Built a responsive interface using Bootstrap and managed backend logic with Laravel and MySQL.
